Accelerated Benefits Demonstration Project—0960-NEW

The Accelerated Benefits Demonstration Project is a multi-phase study designed to assess whether providing new SSI disability recipients with certain benefits will stabilize or improve their health and help them return to work early. In this long-term study, new SSI disability recipients (i.e., those who have just begun receiving benefits and who have at least 18 months remaining before they qualify for Medicare) will be divided into three groups: (1) A control group who will just receive their regular SSI benefits; (2) a treatment group who will receive immediate access to health care benefits; and (3) a treatment group who will receive health care benefits and additional care management, employment, and benefits services and support. The study, which will be conducted for SSA by research contractors and health care experts, will assess if the additional medical benefits and employment supports help new beneficiaries improve and return to work earlier and if there is a difference between the treatment groups. The respondents are beneficiaries who have just begun receiving SSI disability benefits and are not yet eligible for Medicare health benefits.

Type of Request: New information collection.
